- What is it used for?
- Registering a new user account in *Cal e-GGRT*
- Accepting a Designated Representative Invitation
- Overview of system layout and operation
- Key reporting dates
- Q&A

What is *Cal e-GGRT*?

- *Cal e-GGRT* is based on the U.S. EPA greenhouse gas reporting tool
- *Cal e-GGRT* must be used to report GHG data required by the California Regulation for the Mandatory Reporting of Greenhouse Gas Emissions (the regulation)
- Data must be separately reported to *Cal e-GGRT*, even if also reporting to U.S. EPA
- *Cal e-GGRT* requires additional data to support California cap-and-trade

What is Cal e-GGRT Used For?

- Cal e-GGRT is the system used to report all data required by the GHG mandatory reporting regulation
- The tool contains modules for each sector required to report
 - Also includes modules for Fee Regulation and SF₆
- Multiple users can be associated with a single facility or entity
- Verifiers can be associated with facilities and entities in the tool for data review purposes

Registering in Cal e-GGRT

- Before using Cal e-GGRT, it is necessary to perform **NEW USER REGISTRATION**
 - This applies to ALL users, even those previously reporting to ARB
- Registration is separate from U.S. EPA registration
- Cal e-GGRT sends DR Invitation Codes to primary managers to begin facility registration
- Invitation Codes generated by the tool are used to associate registered users with facilities
- Users may be Designated Representatives (DRs), Alternate DRs, and Agents
- A user can be associated with multiple reporting entities

Reporting: Mechanisms

- Cal e-GGRT requires data in different formats, depending on sector requirements, as identified in the tool
 1. Direct Data Entry – Enter data through the on-screen interface. All sectors have direct data entry.
 2. XML Data Upload – Some sectors require specific data that are uploaded to the system as an XML file generated from a provided spreadsheet template
 3. Attached Spreadsheet Data – For some supporting data, Excel spreadsheets are attached to the tool, but not uploaded to the database
- There is not a mechanism for a full report XML upload

Reporting: Validation Messages

- Tool provides data validation
- Most messages must be cleared before report submittal
- Clicking on message brings you to where the issue occurred

¹ Validation Types: Cal e-GGRT generates a variety of validation types, defined below:

- Data Completeness: data required for reporting is missing or incomplete.
- Data Quality: data is outside of the range of expected values. The value you have provided is outside the ARB estimated range for this data element. Please double check this value and revise, if necessary. If you believe it to be correct, please submit the value as is.
- Screen Error: a data value or combination of data values prevents Cal e-GGRT from continuing to the next page. Typically, this will not appear on the Validation Report, but instead will be displayed on the data entry page at the time the error was created.
