

**Implementing The Diesel Risk Reduction Plan:
*Stationary Diesel-Fueled Engines***

California Environmental Protection Agency
Air Resources Board

**Stationary Diesel-Fueled Engine
Control Measures**

For new and existing stationary diesel-fueled engines, developing measures for the control of PM and criteria pollutants

Overall Approach to Retrofit

- **Identify engines and applications where retrofit technologies will work**
- **Identify engines and applications where retrofit technologies will not work**
- **Identify engines and applications where further analysis is warranted**

3

Engine Applications to Evaluate

- **Emergency Standby Generators**
- **Prime Power Generators**
- **Compressors**
- **Cranes**
- **Rock Processing**
- **Irrigation Pumps**
