

# Advisory

to: MOTOR FUEL PRODUCERS,  
IMPORTERS, and DISTRIBUTORS

Number 112

September 1994

## WINTERTIME OXYGENATED GASOLINE PROGRAM 1994/95

This advisory is to inform you that the wintertime oxygenated gasoline program for 1994/95 will begin on October 1, 1994. All gasoline is required to contain between 1.8 and 2.2 percent oxygen by weight during the control period. Please refer to Section 2258 of the California Code of Regulations for the details of the regulation. For your convenience, the applicable dates of the control periods are listed below. These control periods reflect amendments which were approved by the Air Resources Board in 1993 and became formally effective in September 1994.
