The failure of any Party to enforce any provision of this Agreement shall not be construed as a waiver of any such provision, nor prevent such Party thereafter from enforcing such provision or any other provision of this Agreement. The rights and remedies granted all Parties herein are cumulative and the election of one right or remedy by a Party shall not constitute a waiver of such Party's right to assert all other legal remedies available under this Agreement or otherwise provided by law.

(14) **SB 1402 STATEMENT**

Senate Bill 1402 (Dutton, Chapter 413, statutes of 2010) requires the ARB to provide information on the basis for the penalties it seeks (see Health and Safety Code section 39619.7). This information, which is provided throughout this settlement agreement, is summarized here. ARB alleges the following:

The manner in which the penalty amount was determined, including a per unit or per vehicle penalty.

Penalties must be set at levels sufficient to discourage violations. The penalties in this matter were determined in consideration of all relevant circumstances, including the eight factors specified in Health and Safety Code section 43031.

The per unit penalty in this case is a maximum of $35,000 per day per strict liability violation. ARB alleges that over-oxygenated fuel was supplied over a time period of four (4) days. The total amount of penalty in this case is $10,000, reflecting an average penalty of $2,500 per day. The penalty was reduced in consideration of a number of facts, including: that this was an unintentional violation and KINDER MORGAN's diligent efforts to comply and to cooperate with the investigation.

The provision of law the penalty is being assessed under and why that provision is most appropriate for that violation.

The penalty provision being applied in this case is Health and Safety Code section 43027 because ARB alleges that KINDER MORGAN sold, offered for sale, supplied, and/or transported gasoline in California in violation of California Code of Regulations, title 13, section 2262.5(b).

Is the penalty being assessed under a provision of law that prohibits the emission of pollution at a specified level, and, if so a quantification of excess emissions, if it is practicable to do so.

The provisions cited above do not prohibit emissions above a specified level. ARB alleges that since the fuel did not meet California air pollution

standards, any emissions attributable to them are illegal. However, it is not practicable to quantify these emissions because the information necessary to do so is not available.

(15) KINDER MORGAN acknowledges that ARB has complied with SB 1402 in prosecuting and settling this case. Specifically, ARB has considered all relevant facts, including those listed at Health & Safety Code section 43031, has explained the manner in which the penalty amount was calculated (including a per unit or per vehicle penalty, if appropriate), has identified the provision of law under which the penalty is being assessed and has considered and determined that this penalty is not being assessed under provision of law that prohibits the emission of pollutants at a specified level.

(16) Penalties were determined based on the unique circumstances of this matter, considered together with the need to remove any economic benefit from noncompliance, the goal of deterring future violations and obtaining swift compliance, the consideration of past penalties in similar cases, and the potential costs and risk associated with litigating these particular violations. The penalty reflects violations extending over a certain number of days considered together with the complete circumstances of this case. The penalty was discounted in this matter based in part on the fact that the violator made unusually diligent efforts to comply and to cooperate with the investigation. Penalties in future cases might be smaller or larger on a per day basis.

(17) The penalty in this case was based in part on confidential business information provided by KINDER MORGAN that has not been retained by ARB in the ordinary course of business. The penalty in this case was also based on confidential settlement communications between ARB and KINDER MORGAN that ARB does not retain in the ordinary course of business either. The penalty is the product of an arm's length negotiation between ARB and KINDER MORGAN and reflects ARB's assessment of the relative strength of its case against KINDER MORGAN, the desire to avoid the uncertainty, burden and expense of litigation, obtain swift compliance with the law and remove any unfair advantage that KINDER MORGAN may have secured from its actions.
