Company: BAE Systems Electronic Solutions

Office phone: (+1) 607-770-3276

E-mail address: robert.w.devine@baesystems.com

- Bob is the director of products and technology for the BAE Systems HybriDrive® Solutions business area.
- He has over 28 years working development of products for the transportation industry, including flight controls, jet engine controls and hybrid propulsion systems.
- He is currently responsible for leading product development and technology efforts for BAE System's hybrid electric propulsion and power management business.
- Additionally he is responsible for developing and executing product roadmaps that shape future product and system capabilities in line with future market direction; clearly supporting greater electrification of transit buses leading to full electrification.
- Bob holds a BS degree in physics and an MS degree in electrical engineering.
