**Peterson Tractor construction repowers of a Caterpillar D8L dozer**  
**Subject: Non-feasible installation**

Dear Mike,

After giving thorough consideration to the matter, our team of HUSS engineers and Installation technicians have come to the conclusion that it is currently not feasible to install HUSS DPF devices on the following Caterpillar machines:

- D8L dozer

The primary issues with this installation include 1) the need of double system for this specific vehicle and 2) the lack of sufficient available hood space to mount the HUSS filter system. This could lead to sufficient operator distraction, enough to potentially create a safety hazard during machine operation.

Please feel free to contact us should you have any additional questions on this matter.  
Thank you for your interest in HUSS products!

Sincerely,  
Huss, LLC
