

Air Resources Board

Monitoring and Laboratory Division Engineering and Certification Branch

Public Workshop Meeting Agenda September 20, 2013

Workshop Description	To discuss a proposed field study to better understand the scope and nature of overpressure alarms occurring at California gasoline dispensing facilities (GDF) equipped with in-station diagnostic (ISD) systems. This proposed study would build upon prior ARB staff fieldwork which was described in a series of public workshops held in October and November of 2012. Results from this new field study along with data collected previously will be used to support new ISD alarm performance standards that the Board would consider for adoption at a November 2014 public hearing.
Meeting Location	Cal/EPA Headquarters Building Klamath Training Room, Second Floor 1001 I Street Sacramento, CA 95814
Meeting Date and Time	Friday, September 20, 2013 10 a.m. to 12:00 p.m. PDT
