Phase II Enhanced Vapor Recovery and In-Station Diagnostics Conference

April 2, 2008

6:30 PM to 8:30 PM

Riverside County Supervisor's Board Room

4080 Lemon St.

Riverside, CA 92501

The South Coast Air Quality Management District is actively seeking ways to help gasoline dispensing facilities operating within our jurisdiction to comply with State of California Phase II Enhanced Vapor Recovery upgrade requirements.

Come to our conference on April 2nd to learn how to avoid delays in the upgrades. Our goals for the conference are to:

- Inform the regulated public of the requirements
- Provide you with the available options for equipment and financing
- Share ideas that will ensure the permitting process goes smoothly

We held a public conference at our Diamond Bar facility on February 14, 2008. At that conference, representatives from manufacturers of Phase II EVR equipment, the California Service Station and Auto Repair Association, and government agencies such as California Air Resources Board (CARB) and California Certified Unified Program Agencies (CUPA) came to provide information on the requirements of the law, financing options, equipment availability, and other topics. We noticed that most of the attendees came from Los Angeles county and the surrounding areas.

We are holding another conference in Riverside on Wednesday evening, April 2, 2008 to make this conference more accessible and convenient to the San Bernardino and Riverside counties' business owners. In addition to summarizing the information presented at the previous conference, the recent amendments to AQMD Rule governing operations at GDFs will be presented.

This conference is FREE, but due to limited space pre-registration is required.

We need to hear from you by Friday, March 28, 2008. To register for this event and secure a seat:

- *Send an e-mail with your name, company name, telephone number and e-mail address to gdfconference@aqmd.gov; or*
- *Contact Evangelina Barrera at (909) 396-2583.*
