To: All Interested Parties

The draft Enhanced Vapor Recovery Technology review released in April 2002 identified proposed regulatory amendments to the Enhanced Vapor Recovery program. At the June 18, 2002 workshop, staff outlined additional improvements to the vapor recovery certification and test procedures. The proposed regulatory language will be discussed at a workshop scheduled for September 9, 2002.

The proposed procedure revisions are being posted on the website now to allow time for review prior to the workshop. The attached table shows several new proposed new test procedures as well as the existing methods that will be updated. The table also provides a staff contact for each certification and test procedure. Some procedures are not available at this time but will be released within the next two weeks. We would appreciate your comments on these proposed revisions by no later than September 13, 2002 in order to incorporate your suggestions for the staff report to be released on October 25, 2002. These regulatory changes are scheduled to be considered by the Air Resources Board at the December 12-13, 2002 Board meeting.

As always, we appreciate your input on the vapor recovery program. If you have questions, please contact Cindy Castronovo at (916) 322-8957 or via email at ccastron@arb.ca.gov

Sincerely,

George Lew, Chief
Engineering and Certification Branch
