This workshop will cover the following proposals, which are intended to promote statewide consistency and address technical issues with certain existing test procedures used during vapor recovery equipment certification:

- Revise the test procedure used to determine emission factor for standing loss control for aboveground storage tanks.
- Revise the test procedure used to determine volumetric efficiency for Phase I EVR systems used on aboveground storage tanks.
- Propose standards for conventional nozzles used at GDFs serving fleets of vehicles equipped with onboard refueling vapor recovery (ORVR) systems.
- Codify existing procedure for certifying and testing field delivery tanks (cargo tanks).
- Propose minor administrative and editorial changes to vapor recovery Certification Procedures, Test Procedures, and Definitions.
